APPLICANT : TACHIKAWA SPRING CO LTD;

INVENTOR : ISHIKAWA TOSHIO;

INT.CL. : B60N 1/02

TITLE : HOUSING TYPE SEAT OF VEHICLE  
OR THE LIKE

ABSTRACT : PURPOSE: Not to be dislocated a seat portion from given housing position even when the positions of a shaft supporting member and a roller stopper portion are deviated by positioning and supporting the seat portion by means of two points of the shaft supporting member and the roller stopper portion which are fully separated in distance from each other in the position of the housing state.

CONSTITUTION: A shaft supporting member 14 is freely inserted into the guide slot 9 of a guide supporting rod 8 which supports a seat portion on a frame 6, and the seat portion is slidably and rotatably mounted. And a roller 10 which is projected into the rear end portion of the guide supporting rod 8 is guided by means of a guide rail 7 installed on the frame 6 to make given operation which is restrained. And in the state of housing the seat portion 1, a pair of the guide supporting rods 8 is in an upstanding position, and the forefront end portion of each guide slot 9 contacts each shaft supporting member 14 to support a load. Further, the guide rail 7 of each guide supporting rod 8 contacts a roller stopper portion 24 in its lower end portion, and the seat portion 4 is positioned not to enter into the inside of a recess portion 3 for housing no more.
